

AMENDMENTS TO THE DRAWINGS:

Please amend the drawings to include components of the phase error detector as now shown in Fig. 1 as set forth in the attached replacement sheets and marked-up sheets in the Appendix following page 4 herein.

REMARKS

In response to the Examiner's request to provide some further description of the phase error detector shown in Fig. 1 and described on page 3 of the specification, applicant has amended Fig. 1 and the specification to include the conventional components of the phase error detector.

In its most basic form, the phase error detector comprises a signal receiver, a signal generator, and a processor which executes the claimed algorithms. No new matter is being added by the amendments to the drawings and specification since the receiving, sending, and processing functions of the phase error detector are clearly described in the original specification.

Petition is hereby made for a one-month extension of the period to respond to the outstanding Official Action to May 24, 2007. A check in the amount of \$120.00, as the Petition fee, is enclosed herewith. If there are any additional charges, or any overpayment, in connection with the filing of the amendment, the Commissioner is hereby authorized to charge any such deficiency, or credit any such overpayment, to Deposit Account No. 11-1145.

Wherefore, a favorable action is earnestly solicited.

Respectfully submitted,

KIRSCHSTEIN, OTTINGER, ISRAEL & SCHIFFMILLER, P.C.
